

Drop Dead, Gorgeous

Drop dead, gorgeous / Go ahead and die
I ain't time to hear another empty alibi
Drop dead, gorgeous / No matter what you do
I don't care what you say now that we are through

My friends all told me long ago that you were no good
Now you have broke my heart like the said you would
You should have seen from the first that our love's no game
But you chose to play around you got yourself to blame

Drop dead, gorgeous / Just leave me alone
Take your claws outta my soul and my number outta your phone
Drop dead, gorgeous / You just make me sick
I advise you to get outta my way and to do it quick

How many guys did you hit on right in front of me?
How many times did it happen and I refused to see?
I can't keep on letting you make up your own rules
I can't stand another night when you play me like a fool

Drop dead, gorgeous / Go ahead and croak
Why don't you evaporate like a puff of smoke?
Drop dead, gorgeous / Best just go away
There's nothing you can do so that you can stay

I don't know why you'd think
That I'd change my mind
You must see you're nothing to me
I've left you behind
