

She Says
(Greb)

She says you don't understand
What these pressures can do to a man
She says you don't know
He's not like that when we're alone
She says it's how he was raised
He's not like that on most days
She says he's not really mean
You can't judge him by what you've seen

But when she's alone
She wonders what went wrong
And when he gets home
She wonders what she's done

She says that's not what he meant
It's no big deal, just an accident
She says she can make do
She knows what she's doing, it shouldn't matter to you
She says
She says

She says no
She says no
